

HAW-12G-OTK

Weldolet

for Type-SR probe X1-12G variant in thick walls

Description:

Rheonics HAW-12G-OTK accessory is a hygienic certified weldolet for the SRV and SRD sensors with G 1/2" thread (SR-X1-12G variants). These weldolets are designed for a flush installation in pipe or tank walls (max. thickness of approximately 10mm) while ensuring the sensing element is fully immersed in the flow. The HAW-12G-OTK has a Ø15.1×1.6mm O-Ring for sealing.

Specifications:

Sensor Connection	G1/2"
Mounting Type	Welded
Article Number	27082A
Material	316L
