Mounting

Type-SR Sensor Probes

Description:

Rheonics Retractable Probe is a manual system that enables the quick insertion and removal of a probe into a production process. The system uses a 1 ½" NPT Ball Valve to connect to the process and the insertion depth can be chosen by the customer. The guiding rod can be made to spec according to the insertion depth and the probe length is flexible due to the use of the Rheonics Teletube System. A locking pin on the guiding rod and a support sleeve ensure safe insertion and removal of the probe, avoiding damage of the probe tip with the valve.

Specifications:

Dimensions	700 x 75 x 130 (mm)
Total Weight	9 Kg (19.8 lb)
Operation Temperature	-20 °C to 150 °C
Max Operating Pressure	40 bar
Probe Handling Pressure	Ambient
Article Number	27101A
