DENSITY AND VISCOSITY AT YOUR FINGERTIPS

(actual size)

WHETHER YOU'RE MEASURING GAS OR
HEAVY OIL...

... DOING PVT, EOR OR CO₂ COREFLOOD
ANALYSIS.

Rheonics DVM:
For high-accuracy simultaneous density and viscosity
measurement up to 30,000 psi and 500 F.

WHEN YOU'RE MONITORING PROCESS DENSITY
AND VISCOSITY IN FIELD CONDITIONS.

Rheonics DVP:
Rock-solid inline
process density and
viscosity measurement
for pipes, tanks and
process systems.

Rheonics SRV:
Wide range viscosity
control. Equally at home in
Newtonian and non-New-
tonian fluids, slurries, gels,
dispersions and pastes.
